M4x20m

M5 washer

M5x20m

Spacer 10

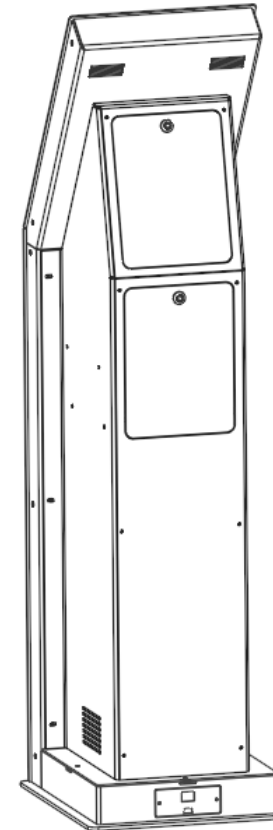

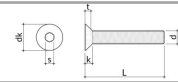

M4 washer

M4x10m

8. Attach the backplate to the two backsides

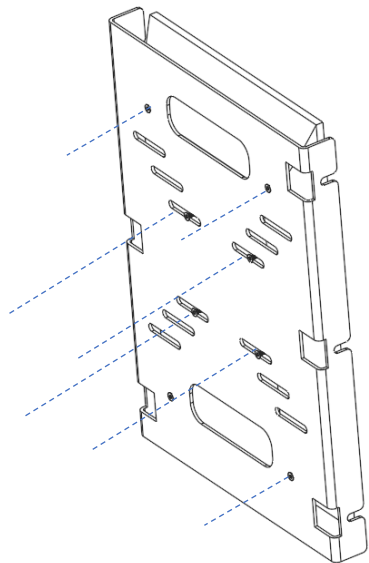

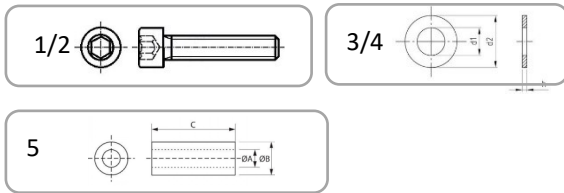

6

Attach the backplate to the two backsides.
close the back plates using the cover plates

1. Attach the VESA plate to the monitor by means of 4 pieces of supplied M4 bolts

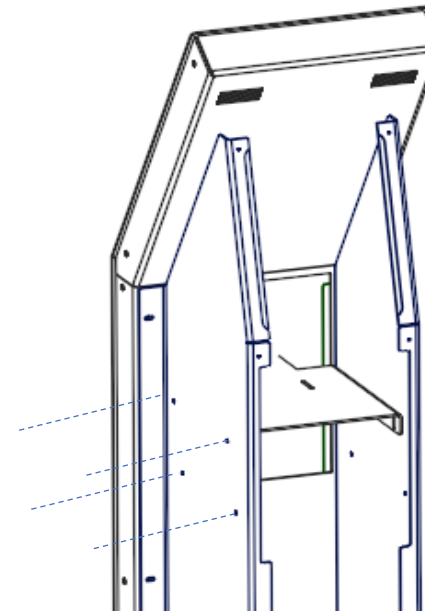

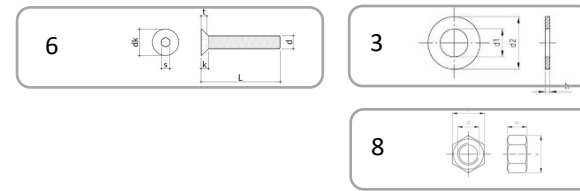

Before attaching the screen to the VESA plate, attach all cables first. Test the screen before mounting in the kiosk.

Place the 10 mm spacer (5) between the monitor and the VESA plate.

Then tighten the 4 M4 bolts on the end against the monitor

6. Attach the printer tray into the two backsides

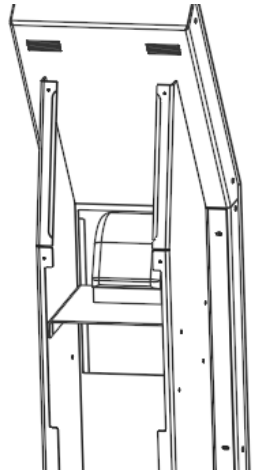

Place the Printer tray between the two back sides:

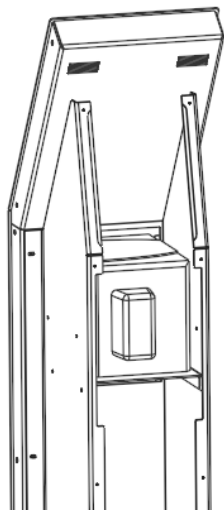

For the Brother QL-820NWB printer place the tray on the top 4 screw holes

For the Fargo DTC1250e printer place the tray on the lowest 4 screw holes

7. Place the printer into the kiosk and attach the cables

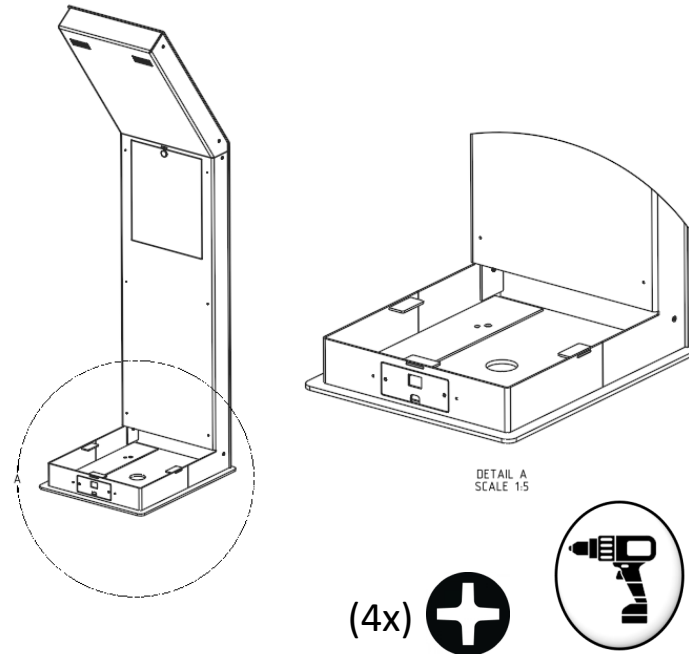

Brother QL-820NWB

Fargo DTC1250e

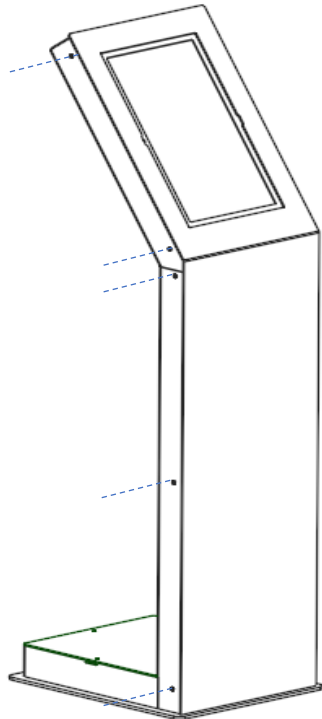

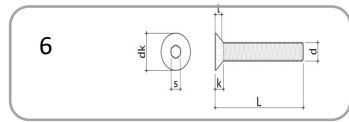

Disconnect the kiosk from the pallet

Remove the back plates from the kiosk with the M4 hexagon socket bolts on the back.

Then unscrew the kiosk from the pallet. This is secured with 4 crosshead screws.

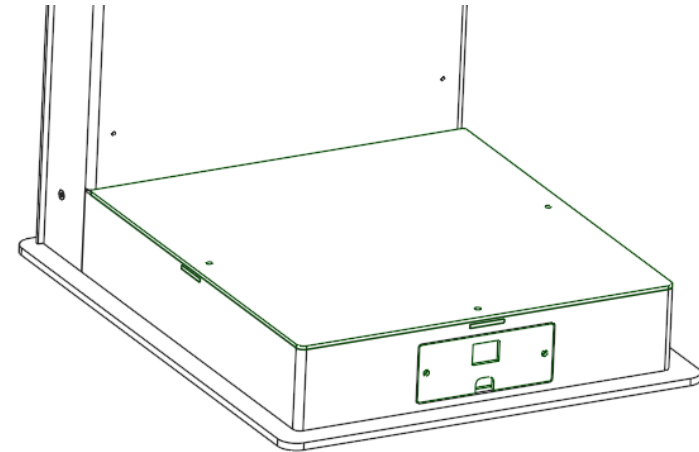

3. Attach the Frontplate into the Kiosk

Slide the front plate into the kiosk and fix the front plate to the sides with 6x M4x10 bolts

Make sure the ends of the cables are on the bottom/back of the kiosk

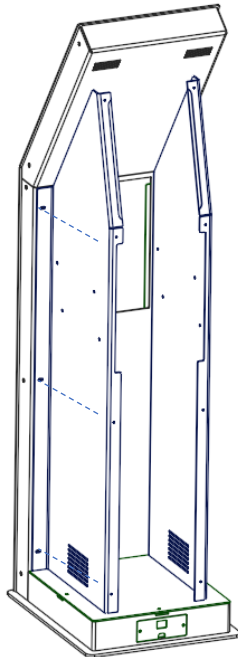

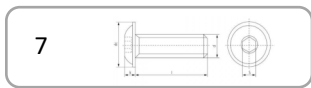

4. Attach the cables

Remove the cable plate and connect the cables to the power and network

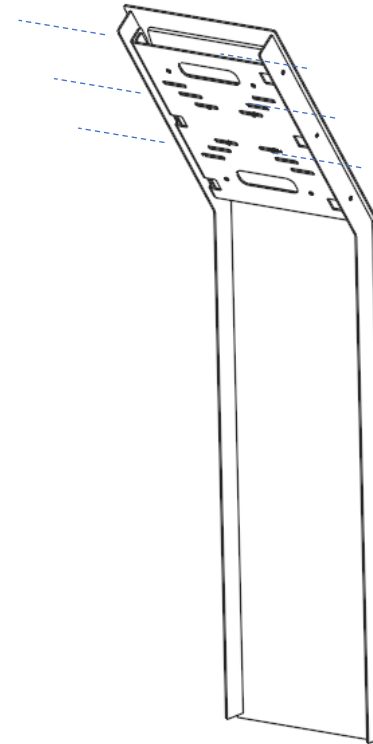

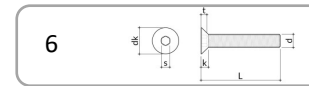

Check that everything works and close the back cover.

5. Attach the Printer backsides to the kiosk

Fix the two back plates for the printer by means of the 6 M4 spherical cylinder head socket head screws. (black)

2. Attach the VESA plate in the Kiosk Front plate

Slide the VESA plate with the monitor into the steel strips of the front plate.

Then tighten the 6 M4x10 bolts firmly.
